the passage opposite to this room exposed to cold draught and other inconveniences. But in the Old Female waiting room, now proposed for the Ear clinic, there is ample accommodation to meet all the present requirements. Extra lamps and tables could be fitted up to enable students to examine cases, which forms the most important part of clinical teaching. They must get acquainted with the method of examining these cases with the special instruments used for the purpose. A portion of the room could be used as waiting room also. This proposal may therefore be kindly approved.

✓ (4) The old male waiting-room may be continued as a clinical lecture hall.

(5) The old male prescribing and compounding rooms may be used for the purpose indicated by the Senior Surgeon.

(6) The present Ear clinic may be reserved for locating the Electro cardio-graphic apparatu when it arrives from England.

5 What is most urgently needed at present is a waiting room for the male and female students. They are seen aimlessly loitering about the compound of the hospital under the trees and on the steps of 'Puttanna Chetty's Dispensary'. They have no suitable place where they could rest or read during their leisure hours or during the intervals between lectures.

6 Until a new Medical College, with all the necessary accessary-buildings, is erected, I would suggest that the male and female waiting rooms of Puttanna Chetty's dispensary, which is generally closed after 11 A.M., be placed at the disposal of the College until 5 P.M.daily, to be used as waiting rooms for students of both sexes. This building is centrally situated and will be of great convenience to the students of both sexes, as they will have two separate rooms instead of one common sitting room. As no inconvenience is likely to be felt by the hospital staff, this

G.O. No 6
1.10.24.

Two new modifications are now suggested by the Principal of the Medical College. They are

(1) Shifting of the Throat, Nose and Ear Department the Victoria Hospital from its present room to the old waiting room for female out-patients. This constitutes a change in the internal arrangement of the hospital work, and as such, must be entirely left to the discretion of the Medical Officer, who is solely responsible for the proper working of the Hospital.

(2) Making the male and female waiting rooms in the Puttannachetty Dispensary available to the male and female students of the ~~xxxxxx~~ Medical College, to rest and read during recess time and between lectures, from 11 A.M. to 5PM I have consulted the Medical Officer, who is agreeable to the proposal which, he considers. will not interfere with Hospital work in any way. This may therefore be sanctioned

MYSORE MEDICAL DEPARTMENT

Confidential and Immediate

No. 6.743-1

Encl. Two

OFFICE OF THE SENIOR SURGEON WITH THE GOVT. OF MYSORE,

BANGALORE.....9.....9.....1924.

FROM DR. B. Md. Usman, L.M.& S.,
Senior Surgeon with the Government of
His Highness the Maharaja of Mysore,
Bangalore.

To The Secretary to the Government of
His Highness the Maharaja of Mysore,
Local and Legislative Departments,
Bangalore.

Mis 74-23-7

Sir,

Adverting to Government Order No. L. 1569-72- Med. 74-23-6, dated 22nd August 1924 sanctioning the utilisation of the Resident Medical Officer's quarters for the museum, library and students' room of the Medical College, I have the honour to forward herewith a representation submitted by the Nurses of the Victoria Hospital with the Matron's opinion and to state as follows:-

2. The location of the Museum, students' room, etc. in the Resident Medical Officer's quarters, will have the most undesirable effect of converting the entire area, meant for the residence of the Nursing Staff and the Medical Staff, and their families into a thoroughfare or public place, and it will be impossible for a respectable family to live in the quarters, as there will be no privacy of any kind.

3. It will throw undesirable temptation before the Medical students and prejudice their interests and the interests and fair name of the institution alike.

4. Its prohibitive distance from the Medical College proper, situated in the old Power House, will operate as an inconvenience to the Principal in the administration of the College and to the students as well The one lies to the east of the Hospital and the other is in the western corner of the Hospital.

6. The space formerly occupied by the Male and Female out-patients' Departments in the main building and now set free by the removal of the same to the Puttanna Chetty Dispensary, is already in use for the purposes of the clinical lectures, for the records and establishment of the Medical College and for the office of the Principal, as shown in the enclosed rough sketch.

7. The arrangement further results in depriving the Post-Graduate Assistant Surgeon of the facility of living in the premises in order to be always available for helping the Resident Medical Officer in emergencies, a necessary and essential part of the Post Graduate training if it is expected to be a really useful and thorough training. The present quarters were constructed in the beginning with this sole object.

8. The old Dental Department which is a very spacious room will serve for the Principal's Office room.

9. The old Female Compounding room can conveniently accommodate the clerical establishment (two Clerks).

10. The old Female prescribing room will be quite sufficient for the College records or other purpose.

11. The old Female waiting room can accommodate the museum and Library of the College.

12. The old male out-Patients' waiting room used now as clinical lecture-hall and the Prescribing and Compounding rooms are available for duty Sub Assistant Surgeon's room and for extension of the Electro-therapy department, if any want arises.

13. The distance between the Principal's Office and the Medical College will be reduced by more than half and the convenience to him and to the other Professors for holding theoretical and clinical classes will therefore be increased twofold, the present room available is central for all purposes.

14. Till sufficient money is found for equipping all this space to provide for extra beds as originally proposed, it is not required for the purposes of the Victoria Hospital, and till the requirements of the College library, museum, etc., outgrow the capacity of these rooms, which will take some years, they could be used as they now are, for the College requirements, to the entire peace and conveni-

(0

convenience of all parties concerned.

14. Sooner or later, separate buildings for the college requirements will have to be constructed and the college authorities will then have ample opportunities of having all their needs suitably provided for.

15. In the meanwhile I earnestly request that the peace of the Hospital staff may not be allowed to be unnecessarily disturbed, when all reasonable present wants of the Medical College can be satisfied as suggested above. I may add that these arrangements were considered as quite ample by Dr. S. Subba Rao, who was Principal of the Medical College till the beginning of this month.

16. I request the favour of very early orders pending the receipt of which I propose delaying the enforcement of the Government Order under advertance.

I have the honour to be,

S i r,

Your most obedient servant,

Wilson

Senior Surgeon.

ASN.

To.

The Medical Officer,
Victoria Hospital,
Bangalore

Through

The Matron

Sir,

We are given to understand that the R.M.C's present quarters is to be taken over for the Medical College again. When the Medical School was located there we were all feeling our liberties cut out considerably as we could not spend our off duty hours in the garden, or the Verandahs of our quarters, as several students would be moving about the premises up and down till night fall. For the past few months we were happy to that, the School was shifted out and felt ourselves free in our environments. We request you therefore to kindly see that the College is not located so near our quarters.

We beg to remain Sir,
Your Obediently Servants

Sir

12

As it is at present, there is absolutely no privacy, especially in my quarters and the passage is used as a public thoroughfare. If the building is taken over for the college it will be worse, not only for the quarters but also for the hospital; as the students cannot be prevented from walking along the verandahs of the hospital and no proper discipline can be maintained as regards visiting hours.

X-Ray room, makes it unsuitable for Ea work, especially. The incessant - - noise, created by the motor etc., in - the adjoining room, makes it extremely difficult to test "hearing" accurately which requires a quiet room free from extraneous sounds. Patients have no waiting room either. At present,men, women and children, have to wait in -- the passage opposite to this room exposed to cold draught and other inconveniences. But in the Old Female - - Waiting room, now proposed for the Ear clinic, there is ample accommodation - to meet all the present requirements. Extra lamps and tables could be fitted up to enable students to examine cases which forms the most important part of clinical teaching. They must get acquainted with the method of examining these cases with the special instru- - ments used for the prupose. A por- - tion of the room could be used as wait- ing room also. ~~This xx pr e e e e a l x may x x x x therefore be kindly x x e e r e v e d~~

" The old Male Waiting room may be continued as a clinical lecture hall.

" The old Male Prescribing and Compounding rooms may be used for the - - purpose indicated by the Senior Surgeon.

" The present Ear clinic may be reserved for locating the Electro Cardi

-graphic apparatus when it arrives - from England.

"What is most urgently needed at present is a Waiting Room for the -- Male and Female students. They are seen aimlessly loitering about the - compound of the hospital under the - trees and on the steps of 'Puttanna Chettv's Dispensary. Thev have no suitable place where they could rest or read during their leisure hours - or during the intervals between lectures

"Until a new Medical College, -- with all the necessary accessory - - buildings, is erected, I would suggest that the male and female Waiting Rooms of "Puttanna Chetty's Dispensary " which is generally closed after 11 A.M., be placed at the disposal - of the College until 5 P.M. daily, - to be used as waiting rooms for students of both sexes. This building is centrally situated and will be of great convenience to the students of both sexes, as they will have two -- separate rooms instead of one common sitting room." ~~xxxx

the Principal of the Medical College, read above.
